

Keeping track of your child's progress

For two weeks of each term we have the coaches test the gymnasts on each of the skills they have been working on for their current level. This is not to say we are not watching and assessing your kids every week, but for two weeks of each term the results are entered directly into our skill tracking software, so that the coaches and yourselves know exactly how your gymnast is progressing.

With our testing system we like to keep it simple.

Means the skill have been introduced and the gymnast is working on the lead ups for the skill, performing the skill with assistance from the coach or the skill is still in the development phase.

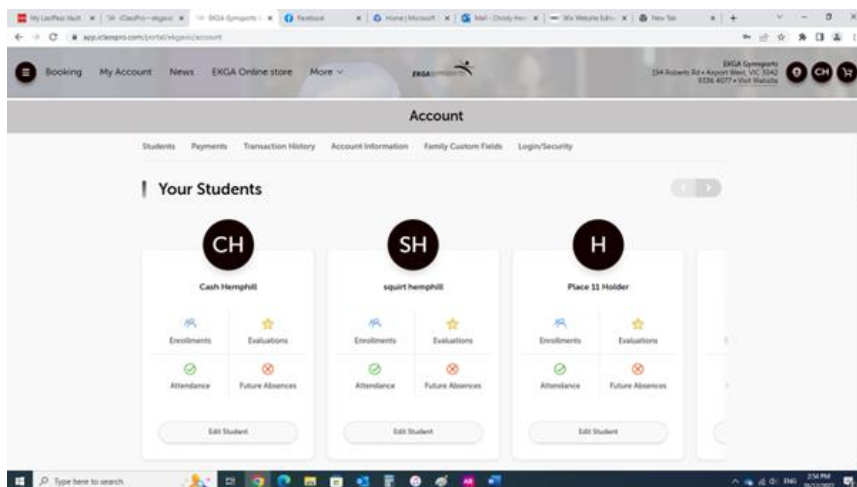

Means the skill is starting to be performed, but still has some errors in form / technique or is not yet consistent

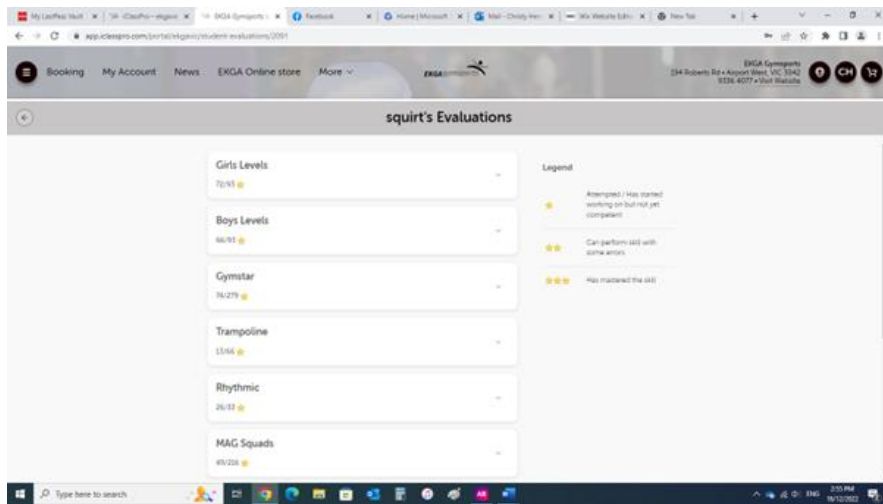

Means the skill has been mastered and is consistently performed to a high standard.

In order for your child to pass a level, they will need to have 3 stars for all skills (or the majority or 3's with no more than a couple of 2's).

Our skill tracking software is LIVE. This means as soon as we record a skill as being assessed, you will be able to log in and view the results, track your child's progress and the great skills they are achieving or what they still have to work on. Just log into your account from our website and click on the "evaluations" button for your student.

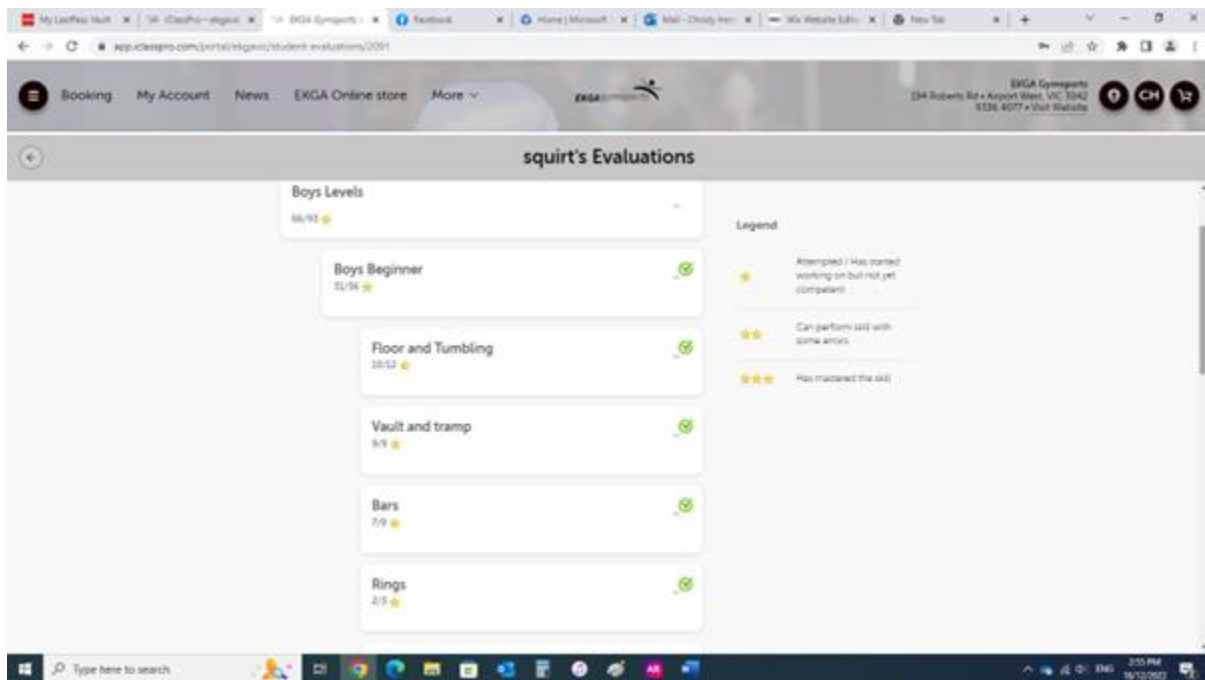

In the Evaluations page, click on the level you would like to see the progress for:

The example below shows us that this gymnast has:

Passed all the apparatus for Boys Level 1.

By clicking on the apparatus name, you can see the details of individual skill assessments for that level.

We like to share the good news!

You will receive emails from us after each assessment. These emails will show you the results of the most recent assessment. You will be able to see skill testing ratings and results, and if your child has mastered a level or all the skills from one apparatus it will give you the option of printing out a certificate.

When an entire Level is mastered all of the apparatus are marked as “passed” and the Level is marked as “passed”. This is an exciting time, as it means your child has completed all the requirements for that Level and will be moving up into the next level. After you receive this email our administration staff will be in touch to help you transfer your child into a class the next level up. At this time your child will also be receiving the trophy as recognition for passing the Level. Exciting times!
